The City has heard that other communities in the County may be planning to allow opening Businesses and Community Activities. We respect the right of each community and business to make decisions they believe are in their best interests. At this point, however, the City of Mount Carroll continues to encourage businesses and residents to comply with the provisions of the Governor’s Executive Order, for the health and safety of our fellow residents. We recognize the burden this places on our local community, but to authorize businesses to violate the Governor’s Order places each business at risk for impact of their State Licensure and we simply do not wish to cause longer term complications; to the business or the health of our residents. We join in your hope that these restrictions will begin to be lifted in the very near future and look forward to the same.

Mayor Carl R Bates
